bar() convenience wrapper

The public quick-bar helper uses the same layout and validation pipeline as a one-bar single-staff score.

Single-staff score bars

The implicit single staff is expressed only with notes:.

Ties, slurs, and expressive marks

Canonical multi-staff bars

Staves are declared once; every bar supplies each staff ID.

Moderato

Meno mosso

Pickups and signature changes

Each system restates its clef and key, but a time signature appears only where the meter is set or changes. The second system continues in 3/4 without restating it, and the change to 2/4 opens the third.

Repeat barlines and volta endings

Repeat signs live on the left or right edge of a bar. Labeled endings span bars and pair their **start** and **stop** markers.

Combined end/start repeats keep their two heavy strokes distinct:

The bracket clears extreme notes and remains proportionate at small scales:

Volta brackets continue when a system wraps:

Extreme-register and spacing stress

Release gate: Chopin Op. 9 No. 2

Andante (♩ = 132) F. Chopin

A musical score for Chopin's Op. 9 No. 2 in B-flat major, 3/4 time. The tempo is Andante (♩ = 132). The score is in two systems. The first system shows the right hand with a melodic line and the left hand with a bass line. The right hand has a fermata over a group of notes, with the instruction "express. dolce" below it. The left hand has a fermata over a group of notes, with the instruction "Ped. simile" below it. The second system shows the right hand with a melodic line and the left hand with a bass line. The right hand has a fermata over a group of notes, with the instruction "f" below it. The left hand has a fermata over a group of notes, with the instruction "Ped. simile" below it.

The image displays three systems of musical notation for piano, featuring complex melodic lines with ties and fingerings. The first system begins with a piano (*p*) dynamic and includes a tie that crosses a system boundary. The second system continues the melodic development with various fingerings and ties. The third system concludes with a forte (*f*) dynamic and a final melodic phrase. The notation includes numerous ties, fingerings, and dynamic markings, illustrating the complexity of the piece.

Tie semantics and wrapped continuations

The first tie crosses a system boundary. Tied continuation accidentals are not repeated, while a later re-articulation shows the accidental normally.

This musical notation shows a single measure in 2/4 time. It features a quarter note followed by a tied quarter note. The tied note is marked with a sharp (#) accidental, indicating a change in pitch from the previous measure.

This musical notation shows a single measure in 2/4 time. It features a quarter note followed by a tied quarter note. The tied note is marked with a sharp (#) accidental, indicating a change in pitch from the previous measure.

This musical notation shows a single measure in 2/4 time. It features a quarter note followed by a tied quarter note. The tied note is marked with a sharp (#) accidental, indicating a change in pitch from the previous measure.

Key cancellation and double accidentals

Naturals cancel only the alterations removed from the old key, and appear before the replacement signature.

Famous-score fixture gallery

These public-domain excerpts exercise the release examples at the same time as the notation engine: quartet grouping, dense solo beaming, a transposing single staff, and a chromatic piano pickup.

Mozart · Eine kleine Nachtmusik, K. 525

Allegro W. A. Mozart

The first system of the score for 'Eine kleine Nachtmusik' by Mozart, measures 1-4. It features four staves: Violin I, Violin II, Viola, and Violoncello. The key signature is one sharp (F#) and the time signature is 4/4. The tempo is marked 'Allegro'. The first measure is marked with a forte 'f' dynamic. The Violin I and Violoncello parts have dense solo beaming in the first measure. The Viola part has a chromatic piano pickup in the first measure. The Violin II part has a transposing single staff in the first measure.

Bach · Cello Suite No. 1, BWV 1007

Prélude J. S. Bach

The first system of the score for 'Cello Suite No. 1, BWV 1007' by Bach, measures 1-12. It features a single staff in bass clef. The key signature is one sharp (F#) and the time signature is 4/4. The tempo is marked 'Prélude'. The first measure is marked with a forte 'f' dynamic. The score shows measures 1 through 12, with measure numbers 3, 5, 7, and 9 indicated at the start of their respective lines.

Three staves of musical notation for E-flat alto saxophone, measures 11-15. The key signature is one sharp (F#) and the time signature is 4/4. The notation consists of eighth and sixteenth notes, mostly beamed together in groups of four or six, with some slurs. Measure 11 starts with a treble clef and a key signature of one sharp. Measures 12-15 continue the melodic line with various rhythmic patterns.

Beethoven · Ode to Joy for E-flat alto saxophone

Allegro assai

L. van Beethoven

Musical notation for Ode to Joy, measures 1-4. The key signature is one sharp (F#) and the time signature is 4/4. The notation consists of eighth and sixteenth notes, mostly beamed together in groups of four or six, with some slurs. Measure 1 starts with a treble clef and a key signature of one sharp. Measures 2-4 continue the melodic line with various rhythmic patterns.

p

Beethoven · Für Elise, WoO 59

Poco moto

L. van Beethoven

Musical notation for Für Elise, measures 1-4. The key signature is one sharp (F#) and the time signature is 3/8. The notation consists of eighth and sixteenth notes, mostly beamed together in groups of four or six, with some slurs. Measure 1 starts with a treble clef and a key signature of one sharp. Measures 2-4 continue the melodic line with various rhythmic patterns.

pp

Red. _____

Red. _____

Red. _____

Relative notes and chords, inherited durations, and local 3+3 beams

The key is intentionally omitted, so this uses the C-major default. Each staff begins in its clef's default register, keeps its own pitch and duration anchors across barlines, and groups six sixteenths as 3+3 with local - joins and / breaks. The last bar resolves every chord from its first written pitch and then resolves the remaining chord pitches in written order.

Lowercase, uppercase, and compact duration equivalence

Pitch-letter capitalization has no musical meaning. The first two bars render the same scale using compact **ce** and explicit **c:e**; mixed case is accepted. The last bars exercise lowercase flats and double flats, a compact double sharp, and mixed-case relative chord entry.

Engraved tie and slur bows

Bows are cubic Beziers whose height saturates with the span and whose shoulders flatten long arcs. Ties center inside a staff space and keep their tips and apex clear of staff lines; ties on a line borrow the adjacent space. Slurs pick endpoint raises by scored candidates: the high middle note lifts both endpoints instead of ballooning the arch, the rising line tilts the bow with the melody, and the long phrase goes flat on top with rounded shoulders.

Slur, fingering, and dynamic interaction

Ties leaving dotted notes clear the augmentation dots, and ties outside the staff float past the notehead instead of centering on it. Slur tips sit above their own note's fingering, while fingerings and turn ornaments inside a slur move above the finished bow. A slur with nothing inside it keeps its tips at the notes no matter how steep the interval, and dynamics drop below stems and beams that reach under the staff.

The musical score is written for a single melodic line in 12/8 time. The key signature has two flats (B-flat and E-flat). The score is divided into two systems. The first system begins with a treble clef and a key signature of two flats. The melody starts with a quarter note on G4, followed by a dotted quarter note on A4, and then a series of eighth notes: B4, A4, G4, F4, E4, D4. This is followed by a quarter rest, then a quarter note on C4, a quarter note on D4, a quarter note on E4, a quarter note on F4, a quarter note on G4, and a quarter note on A4. The second system continues the melody with a quarter note on B4, a quarter note on A4, a quarter note on G4, a quarter note on F4, a quarter note on E4, and a quarter note on D4. The score concludes with a quarter rest and a quarter note on C4.

Classical spacing, beam quanting, and aligned dynamics

Horizontal space grows with the logarithm of duration from the bar's shortest note, so mixed rhythms breathe like engraved plate work. Beam slants follow the outer interval in quarter-space steps, go flat over concave contours, and their ends sit on, straddle, or hang from staff lines. Dynamics in one voice share a system baseline, staccato dots keep to staff spaces, ledger-line stems reach the middle line, and chord ties curve outward from the chord.

Accidental columns, systemic barline, and computed staff gaps

Chord accidentals pack into columns from the outside in - topmost nearest the heads, then bottommost - so clusters never overlap. Multi-staff systems open with a barline joining the staves, and with no explicit **staff-gap** the gaps come from the actual ink: the forte under the upper staff's down-stem chord pushes the staves apart just enough.

Seconds in chords

Notes a second (or unison) apart cannot share a notehead column: the upper note of each clashing pair moves to the right of the stem while the lower keeps the left, alternating through longer clusters, with accidentals, dots, ties, and spacing making room for the widened chord.

Harmony symbols

Harmony is an independent duration-bearing timeline in each bar. Symbols remain above the top staff and are centered on the onset where they become active.

Cmaj7 A7 Dm7 G7 Cmaj7

A musical staff in 4/4 time, starting with a treble clef. The staff contains the following notes: a quarter note C4 in the first bar, a quarter note E4 in the second bar, a quarter note G4 in the third bar, a quarter note B4 in the fourth bar, a half note D5 in the fifth bar, and a half note C5 in the sixth bar. The notes are positioned such that they align with the onset of the harmony symbols written above the staff.

Justified systems and indentation

Multi-system scores use LilyPond-style justification by default: timed gaps stretch to the requested width, while the opening system may reserve a distinct indent. The final example opts into a natural-width final system.

Staff labels

Full staff labels occupy the opening-system name column; optional short labels occupy the corresponding column in later systems. Each label centers on its own staff, independently of the group symbol.

A musical score for four instruments: Violin I, Violin II, Viola, and Violoncello. The score is written in 2/4 time. The Violin I and Violin II staves are in treble clef, the Viola staff is in alto clef, and the Violoncello staff is in bass clef. The music consists of a single melodic line for each instrument, starting with a half note and followed by quarter notes. The labels are positioned to the left of their respective staves, centered vertically.

Violin I

Violin II

Viola

Violoncello

Global system balancing

Line breaking evaluates all complete-bar partitions instead of taking the first overflow. This evenly spaced passage chooses two similarly dense systems rather than a compressed three-bar system followed by one over-stretched bar.

Harmony onset anchoring

Chord-symbol duration determines the next change, not the horizontal anchor. Every symbol centers on its own onset: a half-note Cmaj7 centers on the first quarter-note onset, while the following A7 centers on the third.

Dynamics and hairpin clearance

Dynamics and hairpins share one baseline. A wedge shortens before its ending dynamic and begins after a dynamic at its opening event, keeping both labels clear at normal and compact spacing.

Semantic metronome marks

Tempo dictionaries use named beat values, so users never need to paste an eighth-note character. The renderer supplies the appropriate Bravura glyph.

Andante (♩ = 132)

♩ = 96

Metronome glyph set

Every supported tempo beat is tested beside tempo text and parentheses. Each Bravura glyph maintains clearance from the surrounding mark.

<i>Whole</i> (♩ = 60)	<i>Half</i> (♩ = 72)	<i>Quarter</i> (♩ = 96)
		
<i>Eighth</i> (♩ = 132)	<i>Sixteenth</i> (♩ = 168)	<i>Thirty-second</i> (♩ = 216)
		

Tuplets

Tuplets remain inline in the note string. A complete beam suppresses the bracket, while rests or an explicit option retain it.

Clef changes, barlines, and navigation

Polyphonic voices

Grace notes, tremolos, and arpeggios

Single-event tremolo subdivisions 8 through 64 select one through four strokes independently of the written note value. Quarter notes below exercise both stem directions and verify that every cluster remains clear of its notehead.

LilyPond A/B: grace notation

Each committed LilyPond 2.26.0 reference is followed by live `typed-scores` output using only the public API. The reference SVG is sized so one LilyPond staff space equals the renderer's 8pt staff space. This compares geometry at a common engraving scale even though LilyPond uses Emmentaler and `typed-scores` uses Bravura.

Documented grace forms

The tapered grace-slur tips retain LilyPond's visible clearance from both the small grace head and the full-size principal head. The final ordinary slur confirms that grace slurs retain the normal, unscaled bow weight.

The comparison includes the vertical end edges and sloped faces of each StemTremolo strip, not only its overall thickness.

LilyPond 2.26.0

typed-scores

Grace slur weight

Grace-note glyphs shrink, but the independent resolving Slur grob retains the same midpoint and tapered-tip weights as an ordinary slur. Both bows below use the renderer's normal 0.22-space midpoint and 0.10-space endpoint thicknesses.

Beam-aware slur endpoints

Slur anchors and collision obstacles use the beam group's rendered stem direction. The bass phrase begins beside its low first head instead of an imaginary upward stem tip; the first treble phrase descends to its final sixteenth without lifting the right endpoint away from the note. The final treble group has upward stems throughout, so LilyPond's neutral-direction rule puts its slur below the notes.

Slur clearance over beamed sixteenth runs

A slur must keep free air over every notehead it spans, measured across the head's full width rather than only above its center, and beamed boundary notes let the bow deviate an extra space from the melodic interval. In the Bach figure the second and fourth phrases arch over the returning high note and float their right tip above the final low sixteenth instead of diving onto it.

Staccato and script quantization against staff lines

Following LilyPond's script placement, a staccato dot or tenuto bar leaves its notehead and then quantizes to the half-space grid in its direction, never resting on a staff line: the dot under the G on the second line hops below the staff, the A dot centers in the first space, and dots above the middle-line B and the C skip the fourth line into the space above. Ledger notes take their dot a whole space from the pitch with no extra shift. The taller accent family always clears the staff outline by a quarter space.

Fingering band and script family placement

Fingerings follow LilyPond's defaults: digits sit in a common band just above the staff — half a space of staff padding — and rise only when the notehead column or an articulation stacked above reaches higher; stems never push a digit up. The staccato dot below the C shares its event with a digit above.

The wedge and marcato quantize their near edge to the half-space grid like the dot quantizes its center, and the accent — LilyPond’s one unquantized script — clears the staff outline by a quarter space:

Cross-staff clearance of hairpins over slurred chords

Computed staff gaps reserve room for slur arches, so a treble-voice hairpin riding the dynamics baseline keeps free air above the bass staff's slurred chords instead of cutting through their bows.

First-class lyrics

Syllables share the musical onset grid, reserve horizontal room, and use hyphens without consuming notes. Multiple verses occupy independent lanes.

Lyrics target declared staves independently and enlarge the automatic gap between the vocal and accompaniment staves.

Hyphens and melisma extenders continue across barlines and wrapped systems.

Multi-staff lyric and articulation stress test

Extreme registers, outward articulations, slurs, dynamics, direction spans, and two verses on both staves exercise the complete horizontal and vertical collision model. The automatic staff gap must clear the upper staff's lyrics from the lower staff's high ink, while the lower lyrics sit below its dynamics, hairpin, articulations, and low ledger lines.

Ornament comparison

Every implemented ornament shares one script slot above the note and follows LilyPond's outside-staff stacking: the glyph clears the note ink by a fixed gap, and any fingering rides on top of it. The turn family (turn, inverted turn, and the chromatic turn with its flat and natural) uses the short glyph; the trill and the two mordents are taller and keep the same lower edge over the note. The fermata is the tallest and keeps its lower edge over the note.

1	2	3	4	5	6	7	8
turn	inverted-turn	chromatic- turn	chromatic- turn + turn- f=2	trill	mordent	inverted- mordent	fermata

Ornaments stack over articulations and under fingerings, and slur bows arch clear above the whole stack just as they do over a turn:

Light and dark notation themes

The light theme uses black notation ink. The dark theme uses white ink, and the automatic theme follows the surrounding solid text color. Every case recolors both CeTZ geometry and embedded Bravura glyphs.

Dark theme: Chopin Op. 9 No. 2

The canonical release fixture exercises a wrapped grand staff with signatures, beams, dynamics, fingerings, slurs, hairpins, pedal spans, ornaments, grace notes, articulations, and text in explicit dark mode.

Andante (♩ = 132) F. Chopin

The musical score is written for a grand staff, featuring a treble clef and a bass clef. The key signature is B-flat major (two flats). The time signature is 3/4. The tempo is marked Andante, with a metronome marking of 132 quarter notes per minute. The score is divided into four systems. The first system includes a tempo marking and a composer credit. The score contains various musical notations, including slurs, beams, fingerings, dynamics (p, f), and articulations. The piece is in B-flat major, indicated by two flats in the key signature. The time signature is 3/4. The score is divided into measures by bar lines, and the systems are connected by repeat signs. The overall structure is a single melodic line in the right hand and a supporting bass line in the left hand, with a continuous pedal point in the left hand.

Key signature placement in every clef

Signature accidentals follow the conventional staff positions for each clef. Flats descend from the middle of the staff, and only the seventh bass flat (F flat) sits below the bottom line. Sharps stay inside the staff except for the third treble sharp (G sharp), which sits in the space above the top line. Tenor clef is the exception that cannot copy treble: its first sharp drops to the low F line so the whole signature fits within the staff.

treble

bass

alto

tenor

Cancellation naturals reuse the same positions as the signature they replace, so a flat key cancelled in bass clef keeps its F flat below the staff.

Cue-sized measured notes

Cue groups draw notes, chords, and rests at the grace-note size while keeping their rhythmic value. The first bar compares a normal tuplet, a cue-sized tuplet with its numeral, a cue-sized tuplet with `number=never`, and a cue rest and chord. The second bar shows a bracketed cue tuplet containing a rest, a dotted cue note, and a normal-sized tuplet whose numeral is hidden while its bracket remains. Automatic beams break where cue-sized and normal-sized notes meet.

A cue group in a second voice shares a sixteenth upbeat with a normal-sized note: the normal G in voice 1 stems upward with its flag, while the cue-sized thirty-second triplet in voice 2 stems downward, merges with the coincident G notehead, and places its numeral above the noteheads without touching them.

A single-voice cue-sized tuplet upbeat also fills a sixteenth pickup against a written rest in the lower staff.

Cross-staff notation

Staff switches and spacers

A lower-staff voice climbs onto the treble staff with @upper and returns with @lower. The switched notes take the treble clef, point their stems back toward the bass staff, and keep the voice's beat grouping. Spacers (s) keep the upper staff silent without printing rests.

Knead beams

Beam groups that join both staves are kneaded: the beam lies between the staves, upper-staff stems point down to it, and lower-staff stems point up. Secondary beams stack toward the notes where the group begins; articulations follow the notehead side of each stem, and the staves open wide enough for the beam.

Split chords

One chord spans both staves with a single stem: pitches before @lower or @upper stay on the event's staff and the rest move. An arpeggio sign follows the chord across the gap.

Cross-staff slurs and ties

Slurs follow a phrase from one staff to the other, including across a system break, and arch above when their notes lie on two staves. Ties are allowed while both notes are drawn on the same staff; the switch resets at every bar, so the tied target names its staff again.

Accidentals shared by every voice on a staff

An accidental holds for the rest of the bar on the staff that draws it, across all voices. The second voice's F therefore needs a natural after the first voice's F sharp. The bass-staff voice sharpens F4 on its own staff, so its F4 moved onto the treble staff follows the treble staff's accidentals and needs no sign.

Three staves

Beamed staff switches work between any neighboring staves.

Beethoven: Moonlight Sonata, measures 178–185

The Presto agitato coda sends the right hand's arpeggios down onto the bass staff and back up, with triplets, cross-staff slurs, and kneed sextuplet beams, all written directly in the notation language.

L. van Beethoven

Measures 178-179. The right hand features a triplet of eighth notes (marked *f*) and a long slur spanning across the measure. The left hand has a triplet of eighth notes. The key signature is three sharps (F#, C#, G#) and the time signature is 4/4.

Measures 180-181. The right hand continues with a triplet of eighth notes (marked *f*) and a long slur. The left hand has a triplet of eighth notes. The key signature is three sharps (F#, C#, G#) and the time signature is 4/4.

Measures 182-183. The right hand features a triplet of eighth notes (marked *f*) and a long slur. The left hand has a triplet of eighth notes. The key signature is three sharps (F#, C#, G#) and the time signature is 4/4.

Measures 184-185. The right hand features a triplet of eighth notes (marked *f*) and a long slur. The left hand has a triplet of eighth notes. The key signature is three sharps (F#, C#, G#) and the time signature is 4/4.

Measures 186-187. The right hand features a triplet of eighth notes (marked *f*) and a long slur. The left hand has a triplet of eighth notes. The key signature is three sharps (F#, C#, G#) and the time signature is 4/4.

LilyPond A/B: cross-staff beams

A lower-staff voice crosses to the treble staff inside two beat groups, then an upper-staff voice alternates between the staves note by note. Both engravers knee the beam between the staves for the first group and for the alternating eighths. LilyPond keeps the second sixteenth group's stems upward under one steep beam, while `typed-scores` knees every beam group that spans two staves and limits the slant to one staff space.

LilyPond 2.26.0

`typed-scores`
